CLOUDFLARE

Why Cloudflare One?

Our agile SASE platform is...

- The fast path to safe AI adoption
- The easy-to-use SASE
- Truly composable & programmable

...and is natively built into our connectivity cloud

- One platform extends well beyond SASE
- One network architecture unified at global scale
- Simple packaging for maximum economic value

227% ROI

$21.4m NPV over three years

Never pay for user bandwidth
Every seat license builds your WAN fabric
One global network, one simple price
Simplified connectivity costs, DEX included
All-inclusive multimode CASB

CLOUDFLARE

Accelerating SASE momentum with an intuitive platform

Why Cloudflare One is easier to use, even for leaner teams

Deployment

- Single control plane across solution components
- API-first options enabling IaC & automated deployment models
- Reduce integration setup tasks across the entire capability space

Operational tempo

- Consistent controls on composable, programmable platform
- Integration primitives as “first class citizens” (e.g. IdP, EDR, MDM, groups, etc.)
- Optimized operations for both human and agent interactions

World's #1 job website

Contractor (third-party) access

Authenticate external users with social IdPs and deliver clientless access to web apps and other browser-based resources.

Delivery Hero

Local delivery platform

Simplify IT integration for M&A

Avoid a traditional network merge entirely. Integrate with multiple IdPs and provide per-app internal access during M&A.

Canva

Graphic design software

Privileged access to infrastructure

Extend Zero Trust controls to sensitive infrastructure resources without disrupting developer workflows.

EQT

Financial services

Smooth UX for cloud migrations

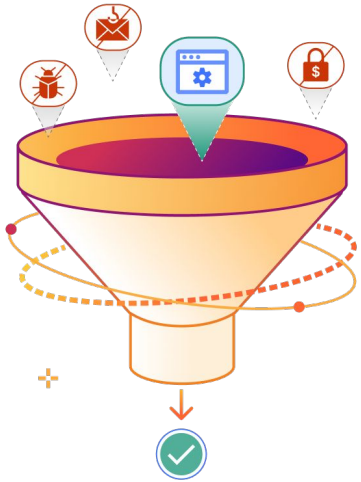

Maintain business continuity during times of change, like rehosting apps or migrating identity directories to the cloud.

USE CASE IN ACTION

CLOUDFLARE

DNS filtering for web protection

Simple to deploy and scale for quick time-to-value

Built on one of the fastest and most reliable DNS resolvers (1.1.1.1)

Best-in-class capabilities

Streamlined management
including clientless options and Terraform automation

Global scale
for consistent enforcement and fast user experiences

AI-backed threat intel
with visibility across 8T+ DNS queries daily

Customer impacts

to deploy, with several malicious emails caught in the first hour that others missed

OVERVIEW OF USE-CASE PACKAGES

The value of Interna

A simpler, more powerful model for adopting SASE

Never pay for user bandwidth

Connect your remote, hybrid, and branch users with a single per-seat price. You'll never see bandwidth charges for devices with our user agent installed.

One price per user, not per location

Every seat license builds your WAN fabric

Replace expensive WAN contracts. Every user license contributes to a shared bandwidth pool that connects your entire network of offices and data centers.

One global network, one simple price

Give every user a fast, low-latency connection. Access our entire global network* for one flat price, with no complex regional surcharges.

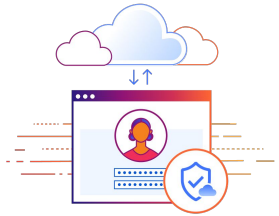

Simplified connectivity costs

Simplify your spending. Get unlimited software connectors and private interconnects to your clouds and data centers at no cost – we only charge for seats or bandwidth.

All-inclusive multimode CASB

Get unified data protection for all your SaaS applications. Includes unlimited API integrations and full coverage for data at rest and in transit.

* Excludes mainland China PoPs

How Shadow AI is driving the shift to SASE

“

In the past, we didn’t think we needed a SASE. A plain VPN was good enough.

But the rise of all these unauthorized AI tools **[Shadow AI]** makes us reconsider. We’re looking into SASE now.

Head of Infosec
Leading British Fashion Retailer
(operates hundreds of stores across 25+ countries)

Leading retailer looks to Cloudflare to secure AI

“

[We are a happy Zscaler customer but] you guys are **light years ahead of [Zscaler]** with AI Security and MCP controls.

We want to do a POC of **MCP Server Portals** and the **Firewall for AI** as soon as we can.
